they get the energy and nutrition they need throughout the time they are with us. All food is homemade and prepared according to your child's stage of development and we work with you to ensure we replicate what you are doing at home with your child. We know that variety is key and therefore design our menus to incorporate a range of different fruits, vegetables, grains, pulses, dairy and types of meat and fish. We use fresh, sustainable, and locally sourced ingredients and we talk about food with your child to help encourage them to try new food types. Children also have the opportunity to prepare healthy snacks in our purpose-built kitchen area as part of the comprehensive range of activities we offer them.
